

For Immediate Release

FoodChek Laboratories Inc. Achieves ISO 9001:2015

Calgary, Alberta, Canada – June 7, 2018 – FoodChek™ Systems Inc. (“FoodChek” or the “Company”) is pleased to report that the Quality Control and Management System of the Company’s wholly owned subsidiary, FoodChek Laboratories (the “Lab”) located in Ste. Hyacinthe, Quebec, has been assessed and approved by National Quality Assurance, U.S.A., against the provisions of ISO 9001: 2015 effective immediately.

Dr. Michael Giuffre, Chairman of the Board of Directors, Chief Scientific Officer and President of FoodChek Laboratories Inc., stated: "This is an important milestone for FoodChek and will continue to facilitate our leading role in the food testing industry and of our global IP Actero™ Elite Enrichment Media brand with both small, medium and major food testing customers such as Eurofins, bioMérieux, Bio-Rad, Hygiena, Roka BioSciences, Tyson Foods, Primus Labs, and Diamond Pet Foods. We would like to thank Renaud Tremblay, Vice President, Quality Control and Regulatory Affairs and the entire Lab team, for championing the daunting work required for the ISO 9001: 2015 certification and this achievement."

Mr. William Hogan, President and CEO, added, “Our world class laboratory, dedicated scientific resources, continued focus on product research, and customer driven development are instrumental to our future growth and global success. This ISO certification is recognized world-wide and a valuable enhancement to our various existing product related regulatory validations and patents that include AOAC International, AFNOR and Health Canada. My congratulations go to Dr. Giuffre, Renaud Tremblay and the entire Lab team”.

About FoodChek:

FoodChek specializes in the development and commercialization of proprietary, rapid, accurate and cost-effective food safety products for the detection of foodborne and environmental pathogens and other microorganisms throughout the human and pet food production chains. FoodChek’s industry-leading and proprietary Actero™ Elite Enrichment Media is the leading recovery process of stressed organisms in the sample enrichment media phase for the detection of *Listeria* spp., *Listeria monocytogenes*, and *Salmonella* spp.
